

# NDA Managed Apple IDs

## Students and Parents

Starting this year our 7<sup>th</sup>/8<sup>th</sup>/9<sup>th</sup> grade students will be using Managed Apple IDs. This will bring changes to the student's device that serves as a learning tool. Let's discuss a few things about Managed Apple IDs.

Where are we now?

- 10<sup>th</sup> grade and above are and will continue to use their current NDA email address as a personal Apple ID.
- Personal Apple IDs are becoming very complex to set up and manage. The switch is designed to make this process easier on students, parents, and the Technology Department.
- If a student forgets a personal Apple ID password, recovering the account can take up to 14 days. Minimizing this and moving incoming classes to Managed Apple ID's will make this easier.

What makes this great?

- IT can now reset students Managed Apple ID passwords very quickly to minimize downtime.
- Two Factor Authentication is now authenticated by a Managed ID and a Managed Device, this eliminates the need for a nearby cellphone.
- Integration with JAMF allows us to control what apps they have access to. We make specific apps available to them to download.

A few other things to know about Managed Apple IDs

- App store and iTunes purchases are now disabled by default.
- Facetime and iMessage are also disabled.

We feel the changes that have been made this year will serve parents and teachers well, knowing the device that is in their hands will be a learning tool. In the coming years more students will be using Managed Apple IDs.

***\*If you are a 10<sup>th</sup>-12<sup>th</sup> grade transfer student you will be creating an Apple ID with your NDA Email address. Please contact the Technology Department for more information.***

Please contact the Technology Department if you have any questions about the use of Managed Apple IDs.
